

SLAUGHTERING RUMOURS POULTRY FROM THE USA

65 000 tonnes (equivalent in weight to 52 million chickens) from the USA being brought into South Africa in the next twelve months.

Sold as portions and also used in the food processing industry.

Almost all poultry from the USA is machine slaughtered and do not meet our criteria of Halaal.

Without the benefit of clear labelling, please abstain and do not fall in error.

For your peace of mind we confirm that **SANHA** does not accept machine slaughter. It certifies and approves locally produced poultry to stringent local and international standards.

Any queries pertaining to the above or any other aspect of Halaal may be referred to our offices.
